

2025 KSEP Annual Meeting Registration Guidelines

1. 2025 KSEP Annual Meeting

“A Better Tomorrow with Exercise Physiology”

- **Dates:** April 10th, 2025 (Thursday) - April 12th, 2025 (Saturday)
- **Locations:** Andong Grand Hotel (April 10) & Gyungkuk National University, Andong Campus (April 11th-12th)
- **Registration Period:**
 1. First Phase of Early Registration: Until March 7th, 2025
 2. Second Phase of Early Registration: Until March 31st, 2025
 3. On-site Registration Available
- **Deadline for Poster and Abstract Submissions:** Until March 7th, 2025 (Friday) 18:00

Registration is available through the conference website (ksep.kr).

[1. Registration] https://ksep.kr/homepage/formPage/conf_

[2. Abstract Submission] <https://ksep.kr/conference/2025annu/static/343>

[3. Payment of participation fee] <https://ksep.kr/event/annual/registration>

2. Instructions for Poster Presentation Abstract Submission

- **Instruction for Paper-Poster Presentation Abstract Submission:** The Paper-Poster and abstract must be submitted in advance through the designated submission section on the website. Posters must be created in the specified **vertical dimensions** and displayed at the conference venue on the designated day. Please deliver a 2-minute summary presentation of the poster. *(Example: Please visit the website <https://ksep.kr/conference/2025annu> - Go to the 'Abstract and Poster Submission' section - Download the Form - Submit the Abstract – Design your poster according to the required vertical dimensions and bring it to the conference venue for display.)*
- **E-Poster Submission Instructions:** The E-Poster, along with the abstract and presentation materials, must be submitted in advance through the designated submission section on the website. The E-Poster must follow the **horizontal dimensions** and be formatted according to the PPT template provided on the website. We kindly request that award-winning e-poster presenters deliver a 2-minute summary

presentation. (Example: Please visit the website <https://ksep.kr/conference/2025annu> - Go to the 'Abstract and Poster Submission' section - Download the Form - Submit both the abstract and the E-Poster in PPT format (horizontal dimensions).

Note: Please refer to the attached files for details. Only members who have paid the current year's annual membership fee are eligible to submit posters for the conference.

3. Round Tables

- **Date & Time:** April 10th, 2025 (Thursday), 11:30 AM - 1:30 PM
- **Location:** Peppermint Hall, Andong Grand Hotel
- **Registration Deadline:** February 28th, 2025 (Friday) by 18:00
- **Eligibility:** Complimentary for registered conference participants.
- **Registration for Round Tables:** [Registration Link]
<https://www.niftyhands.net/event/ewoBnV9YgR4JjVH4u2BAHZ>

4. Build and Disseminate an Innovative Sport Science Community

- **Date & Time:** April 10th, 2025 (Thursday), 18:00 - 20:00
- **Location:** Grand Fore Hall, Andong Grand Hotel
- **Registration Deadline:** March 7th, 2025 (Friday) by 18:00
- **Eligibility:** Complimentary for registered conference participants.
- **Registration for this session:** [Registration Link]
https://ksep.kr/homepage/formPage/conf_

5. For inquiries, please contact:

- **Email:** ksep20256@naver.com
- **Phone:** +82-2-2287-5133

2025 KSEP Annual Meeting

Poster Presentation & Abstract Submission Guidelines

Submission Deadline

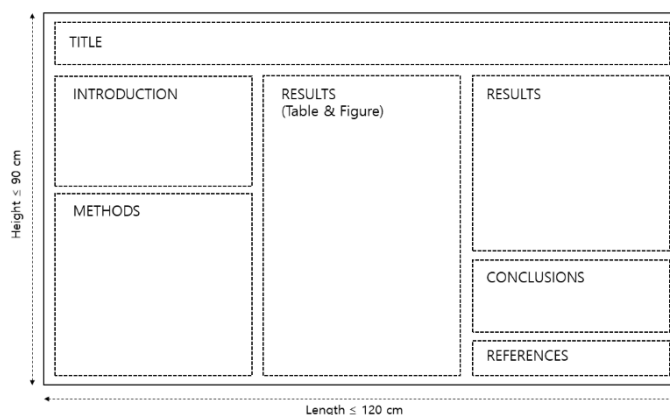

The abstract submission deadline is **March, 7, 2025**

Paper-poster Abstract Presentation Guidelines

- Paper-poster presentations should be printed on one uniform poster sheet with dimensions not exceeding 120 cm X 90 cm (height X width, **Vertical dimension**).
- Paper-poster abstract presentations must be consistent with the contents of the prepared abstract: including a purpose, methods, results, and conclusions.
- Paper-poster presentations are 3 minutes in duration with 2 minutes of questions from the audience and responses from presenter
- The text on the poster must be clearly visible from a distance of 3m

E-poster Abstract Presentation Guidelines

- E-poster presentations must be prepared in Microsoft PowerPoint.
- E-poster presentation files must be submitted by KSEP Homepage (<https://ksep.kr/conference/2025annu>)
- E-poster abstract presentations must be consistent with the contents of the prepared abstract: including an introduction, methods, results, and conclusions.
- Recommends the following layout as a general guideline for all E-poster presentations: **horizontal dimensions**

Title of presentation: Please choose a brief title (maximum of 100 characters) that indicates the content of the research. Please avoid abbreviations in the title. Abbreviations may be used in the text if they are defined when first used.

Abstract Format and Instruction for the International Conference of the Korean Society of Exercise Physiology

Title font size: 12. Font style: Arial

The first letter should be capitalized except for determiners.

(제목 글자크기 12. 글자모양 Arial 관사/조사 등을 제외한 단어 첫 글자는 대문자로 구성)

Authors: *Name, institution, country and email (corresponding author)*

Gil-Dong Hong¹, Kenta Suzuki² and Emma Harris^{3*}

¹Daehan University, Korea; ²Japan University, Japan; ³Lakers University, USA

Affiliation font size: 10. Font style: Arial

Superscript * for the corresponding author

(저자정보 글자크기 10. 글자모양 Arial. 교신저자에 * 표기)

Abstract: *Please ensure that your abstract contains no more than 300 words. Please avoid diagrams, illustrations, tables, references or graphics in the abstract. Provide maximum relevant information in the abstract and the following structure is obligatory: background, purpose, methods, results, conclusions.*

BACKGROUND:

PURPOSE:

METHODS:

RESULTS:

CONCLUSION:

The body font size: 10. Font style: Arial

The number of words in the main body should be below 300.

(본문 글자크기 10. 글자모양 Arial. 영어로 작성. 연구배경/목적/방법/결과/결론으로 구성. 단어수 300 이하)

KEYWORDS: *Keywords must be 5 or less.*

Keywords, Must, Be, Below, Five-words (최대 5개 키워드)

***Email correspondence:** abcde@vwxyz.com Corresponding author's email address. (교신저자 이메일)

Please delete the instructions in blue font on your abstract.

(초록 작성 시, 푸른 글씨의 설명 부분을 삭제하시기 바랍니다.)

Abstract Example for 2025 KSEP Annual Meeting

Gil-Dong Hong¹, Kenta Suzuki² and Emma Harris^{3*}

¹Daehan University, Korea; ²Illbon University, Japan; ³Lakers University, USA

BACKGROUND: The circulating level of endothelial microparticles (EMPs), a cellular biomarker for endothelial function, is increased in most cardiovascular diseases. Enhanced integrity of mitochondria has been recognized as an emerging protective mechanism against vascular complications. Aerobic exercise-induced increased laminar shear stress (LSS) and the treatment of resveratrol (RSV) are known enhancers of mitochondrial biogenesis. **PURPOSE:** The purpose of this study was to determine the effect of LSS and RSV co-treatment on the improvement of vascular homeostasis examined by EMPs production. **METHODS:** HUVECs were exposed to LSS using a cone and plate shear device. HUVECs were treated with 20 μ M RSV for 12h. Immediately following LSS exposure, HUVECs were harvested for protein analysis and cell-culture media was collected for EMPs measurement. Rotenone (Rot) and Antimycin A (AA) were used as specific mitochondrial respiratory inhibitors for Complex I and III, respectively. Western blotting technique was used to analyze protein expression. EMPs (CD31⁺/CD42⁻) production was measured by flow cytometry. **RESULTS:** The level of EMPs production was significantly increased by treatment of mitochondrial complex inhibitors (1.23 \pm 0.45 to 6.78 \pm 0.09 by Rot; 1.23 \pm 0.45 to 6.78 \pm 0.09 by AA; p <.05). However, EMPs production was dramatically decreased by following LSS treatment (1.23 \pm 0.45 by LSS after Rot; 6.78 \pm 0.09 by LSS after AA; p <.05), while expression level of Porin, a mitochondrial content marker, was significantly increased by LSS (0.12 \pm 0.34 to 5.67 \pm 0.89 by LSS after Rot; 0.12 \pm 0.34 to 5.67 \pm 0.89 by LSS after AA; p <.05). The expression levels of Sirt1 and PGC-1 α , mitochondrial biogenesis factors, and Porin were dramatically increased by combined treatment of RSV/LSS, while the level of EMPs production was significantly decreased. **CONCLUSION:** The present study demonstrated that aerobic exercise and RSV treatment can improve vascular homeostasis by the endothelial mitochondrial biogenesis.

KEYWORDS: *Aerobic exercise, Laminar shear stress, Resveratrol, Mitochondrial biogenesis,*
